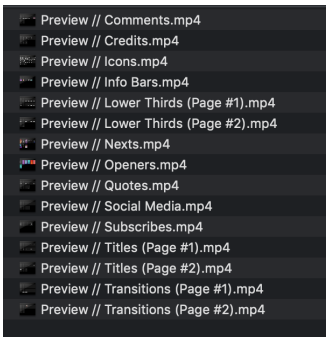
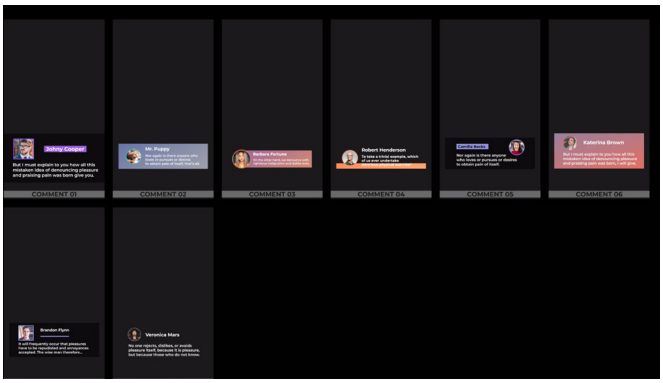
▪ Project files

The project has the next files:

01. Help **– help text file.**

02. Preview Panel **– Demo video clips. These clips help you to quickly browse through all the items and choose the one you like.**



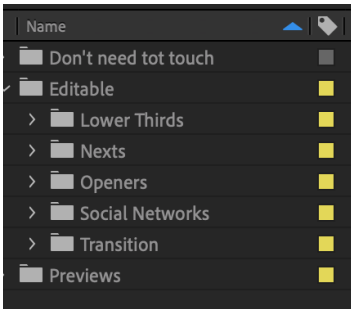


03. Working File - Vertical Graphics Pack.aep file **– the main working file.**

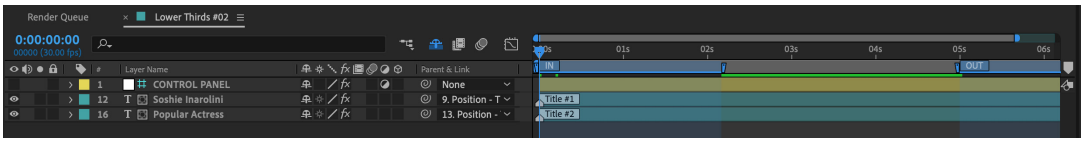
□

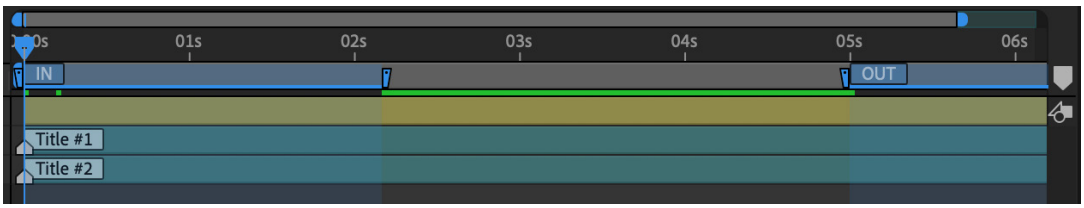
▪ Features of the project

1. The project file has 2 folder:
   "00. Don't need to touch" – ignore this folder;
   "Editable" – main working folder.
   "Previews" – the same as preview clips



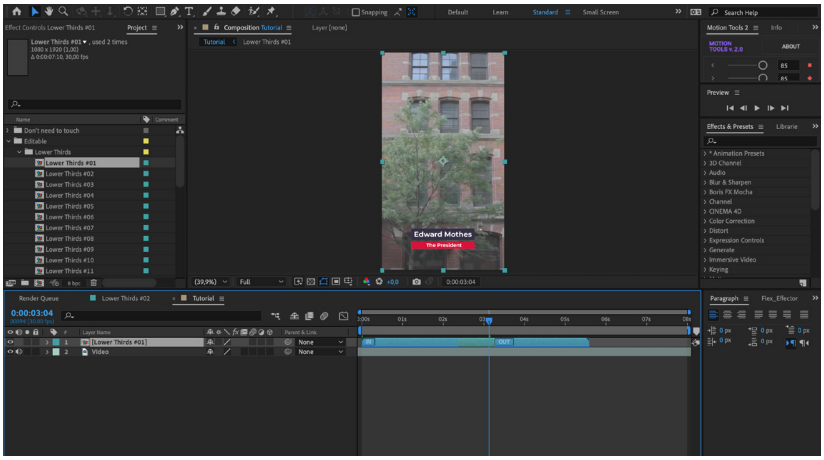
2. The timeline of each title has a IN and OUT markers. It's is an internal setting, just ignore it.



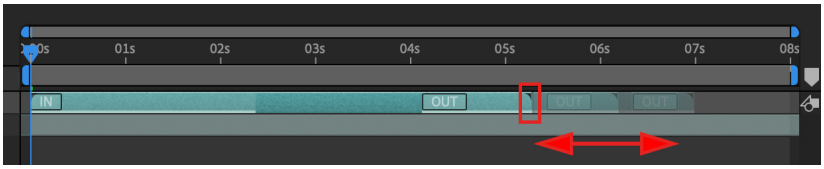


▪ How to change duration

1. After making all the changes and adjusting the item, drag and drop your item comp from folder “Editable” into your working composition.



2. Move the right edge of the composition to the left to decrease or to the right to increase duration. That’s all.



□

▪ How to customize the template

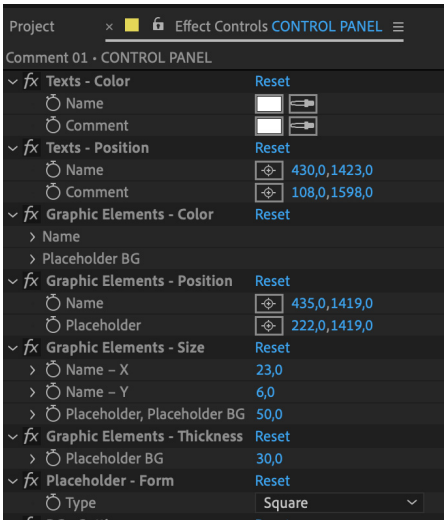
NOTE.
Customize the project is quite easy.
We created instruction for each section to make it easier for you to navigate.
But the principle of customization each section is almost the same.

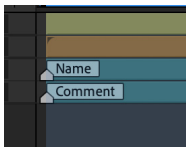
01. COMMENTS

1. Open the “Editable” folder. Open the required composition from “Comments” folder.

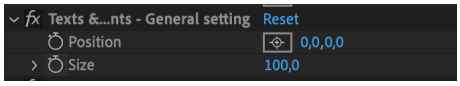
2. Click on the text layers and re-write the texts.

3. You can adjust the settings of composition by clicking on the “CONTROL PANEL” layer. Create as you like.





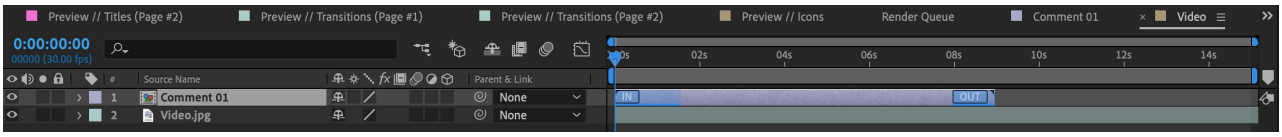
Each layer has a name for easier orientation and adjustment.



Note. Change the general scale and position using this panel.

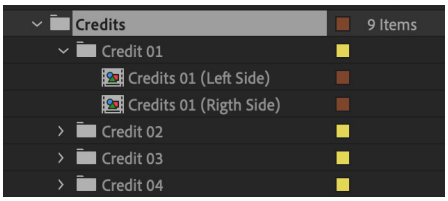
4. After making all the changes and adjusting the item, drag and drop your item comp from folder “Editable” into your working composition.

Move the right edge of the composition to the left to decrease or to the right to increase duration.



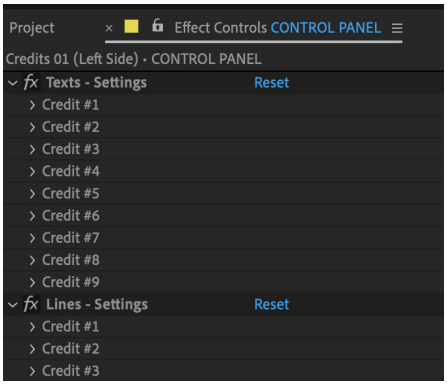
02. CREDITS

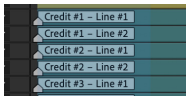
1. Open the “Editable” folder. Open the required composition from “Credits” folder.



2. Click on the text layers and re-write the texts.

3. You can adjust the settings of composition by clicking on the “CONTROL PANEL” layer. Create as you like.

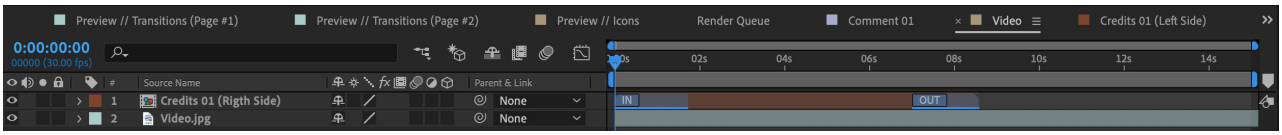




Each layer has a name for easier orientation and adjustment.

4. After making all the changes and adjusting the item, drag and drop your item comp from folder “Editable” into your working composition.

Move the right edge of the composition to the left to decrease or to the right to increase duration*.



03. ICONS
